Desmond Weindorf

Senior Software Engineer | San Francisco, CA | resume@desmondw.com | desmondw.com

Experience

Senior Software Engineer (Urbint), Jul 2021 – Feb 2023

- Built React and Django features for v2 utility damage prevention, including configurable GIS asset maps
- Created parallel Kafka ingestion for historical ticket migrations without blocking the live ticket feed
- Launched customer environments and SSO integrations; resolved migration issues for enterprise utilities
- Reduced Django ticket-filter queries from 23 to 13 per request in local benchmarks
- Diagnosed production outages and improved Kubernetes health checks, Datadog tracing, and incident alerts
- Developed async ticket-ingestion APIs and integration tests for a new ticket lifecycle platform

Senior Software Engineer (Grove Collaborative), Apr 2019 – Mar 2020

- Built Instant Buy checkout and led a holiday presale launch with $716K in sales (98% of forecast)
- Built the Customer Drawer sales channel and iterated on customer segmentation and A/B experiments
- Modernized checkout components in Vue and built dashboards to diagnose payment-funnel drop-off
- Coordinated CCPA delivery by the legal deadline; onboarded and mentored two engineers

Senior Software Engineer (Darby Smart), Dec 2017 – Apr 2019

- Designed and launched Shero Science's customer-facing website in one week following the company's pivot
- Built Stripe checkout and a Rust fulfillment integration with order tracking and shipment notifications
- Migrated search from Solr to Elasticsearch and built search-driven SEO landing pages
- Automated targeted creator outreach and implemented iOS onboarding experiments

Software Engineer (HelloSign), Jan 2015 – Jun 2017

- Owned public API, PHP/Python SDKs, and Salesforce, HubSpot, Oracle, and Gmail integrations
- Extended OAuth 2.0 across API endpoints to support marketplace integrations and flexible billing
- Interim security engineer: triaged HackerOne reports and fixed XSS, CSRF, and authentication flaws
- Built automated regression tests and approval/audit workflows for access to sensitive customer data

Owner (Weindorf Technologies), Apr 2014 – Sep 2014

- Built client websites and established their social media presence

Web Developer (Advantage Computer Services), Jan 2013 – Apr 2014

- Built client websites and PHP web applications with relational databases and PayPal integrations

Skills

Languages — TypeScript, JavaScript, Python, Ruby, Rust, PHP, SQL
